Brian,

I am finalizing the UDEQ comment letter for the Work Plan. The comments were sent to you in an e-mail on 2/24/11. One additional comment that arose during the review process and will appear in the final version of the letter addresses fugitive dusts that occur during excavation of clean fill materials and other site activities:

\* Under Utah Division of Air Quality regulation R307-205-5(2)(a) Fugitive Dust. Disturbance of an area greater than 1/4-acre in size earthmoving, excavation, or movement of trucks or construction equipment over cleared land greater than one-quarter acre in size or access haul roads shall take steps to minimize fugitive dust from such activities. Such control may include watering and chemical stabilization of potential fugitive dust sources or other equivalent methods or techniques approved by the executive secretary.

I should hopefully have the final version of the letter in the mail early next week.

Thanks,

Craig
